

ClientIQ Training User Guide

This guide introduces the ClientIQ Application: Search, Household, Client and Account(s) pages.

Overview

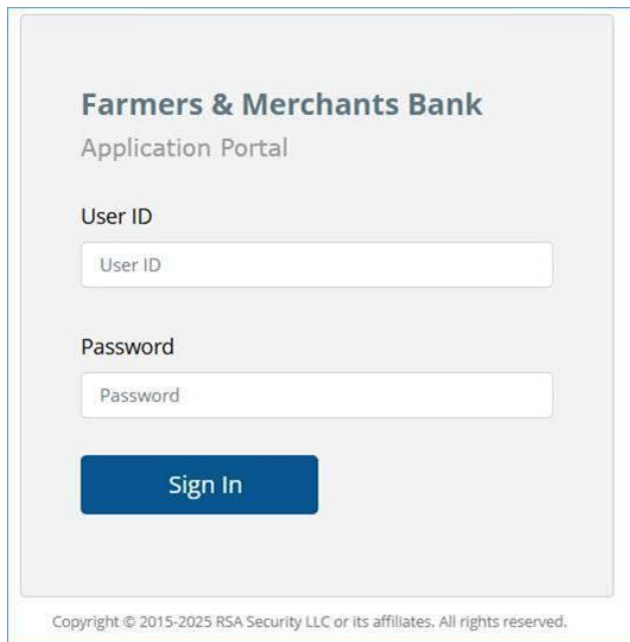

Data from JHA Core (Xperience), JHA Card Processing System (CPS), Laserfiche, Centrix (Positive Pay), and Q2 Online Banking are brought into ClientIQ to provide a comprehensive 360 view of the FMB client in a single application.

ClientIQ provides a consolidated view of FMB clients organized into three ways: Household, Client and Account level.

Accessing ClientIQ

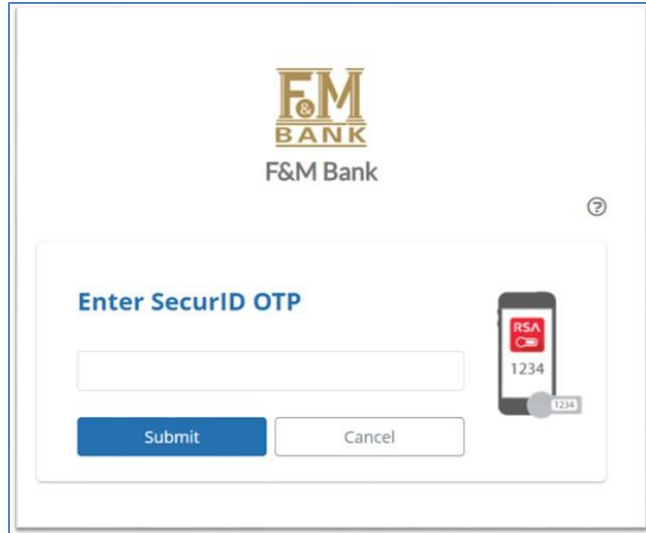

Follow these four (4) steps to access ClientIQ

1. <https://portal.fmb.com/WebPortal/>
2. Enter your window's login (the one you use to access your computer)

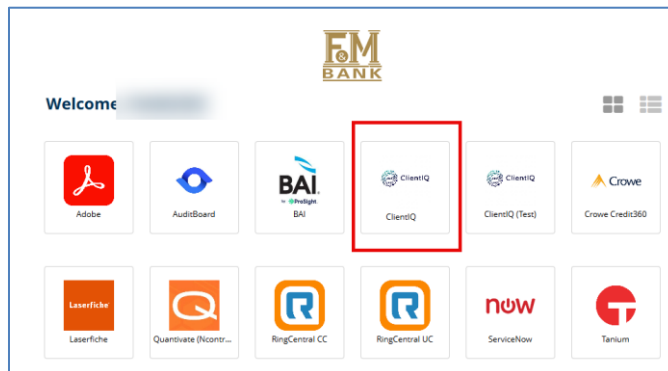

The screenshot shows the login interface for the Farmers & Merchants Bank Application Portal. It features a light gray background with the bank's name and logo at the top. Below the header, there are two input fields: one for 'User ID' and one for 'Password'. A blue 'Sign In' button is positioned below the password field. At the bottom of the page, a small copyright notice reads: 'Copyright © 2015-2025 RSA Security LLC or its affiliates. All rights reserved.'

3. Enter your PIN and Tokencode from SecurID, like you would when using VPN when working from home

The screenshot shows the F&M Bank login interface. At the top is the F&M Bank logo. Below it, the text "Enter SecurID OTP" is displayed. There is a text input field for the OTP, a blue "Submit" button, and a grey "Cancel" button. To the right of the input field is an illustration of a mobile phone displaying "RSA" and the number "1234".

4. Select the icon for ClientIQ [Pre-Prod and/or Production]

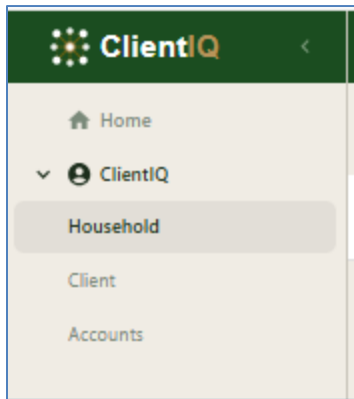

Search

Use of ClientIQ begins with searching for a client. Users may search by client or business name, CIF, SSN, ID, and account number.

The search results will display below the search bar with matching criteria highlighted in yellow and grouped into the following categories: Household, Client and Account.

Selecting the search result from the category will open the respective page and the left navigation bar will be highlighted.

Household

The Household Screen is available when there's a banking relationship with a client with multiple entities. For example:

- Family
 - John and Jane Smith are joint owners on their personal checking and savings accounts
 - Their son Jake Smith is the primary owner of a youth checking account
- Property Management Company
 - Property Management Holding Company maintains a business operating account
 - Property 1 LLC, Property 2 LLC, etc. each maintain their own business accounts

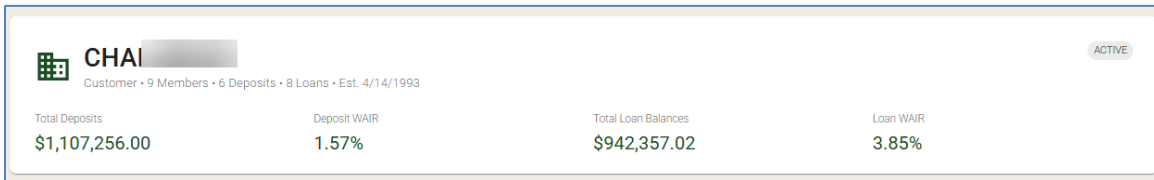

The methodology behind the groupings is based on the following:

1. Loan Groups – Credit admin maintains groupings of clients that represent a lending relationship with the bank, which are displayed as is.
2. Client Relationships - For clients not in loan groups, we put them into households based on their relationships to one another. At a high level, clients are put into the same household if either of the following criteria is met:
 - Same account analysis group, or

- Same Q2 profile and either,
 - a. Same email, or
 - b. Same phone, or
 - c. Same address
- 3. Same Account Analysis Group - groups CIFs that are the primary owners of accounts that are in the same account analysis group into the same household.

The Household screen consists of several sections with widgets embedded to provide information graphically.

Household Header

 CHAI [REDACTED] ACTIVE Customer • 9 Members • 6 Deposits • 8 Loans • Est. 4/14/1993			
Total Deposits	Deposit WAIR	Total Loan Balances	Loan WAIR
\$1,107,256.00	1.57%	\$942,357.02	3.85%

The household header section displays the following fields:

- [Household] name – The name of the household is the name of the loan group, if it exists, else is the name of the head of household.
- Number of [Household] members – Count of the number of members with open deposit or loan accounts.
- Number of Deposits – Count of the number of open deposit or loan accounts associated with active household members.
- Number of Loans – Count of the number of open loan accounts.
- Established Date – First CIF origination date related to the household.
- Total Deposits – Total balance of all deposit accounts associated with the household.
- Deposit WAIR – Weighted average of the interest rate for interest bearing deposit accounts in the household.
- Total Loan Balances – Total loan balance of all loans associated with the household.

- Loan WAIR - Weighted average of the interest rate for active loans in the household.
- Status – The status of the household is active if it has at least one related open deposit or loan account. It is considered inactive if there are no related open deposit or loan account.

Household Members

Household Members (9)				
Search members...				
Member	Role ↑	Ownership %	Since	Actions
Harlene Carol Chalabian	Head of Household	-	4/14/1993	→
Bebo Enterprises LLC	Household Member	-	4/7/1998	→
Hagop Enterprises LLC	Household Member	-	1/7/1999	→
KJack Engineering Co Inc	Household Member	-	4/14/1993	→
KJack Motors LLC	Household Member	-	8/10/2000	→
Jack Steven Chalabian	Household Member	-	4/14/1993	→
Alexandria J. Jernigan	Household Member	-	3/27/2008	→
Jack R. Jernigan	Household Member	-	3/27/2008	→
Jacqueline Dawn Jernigan	Household Member	-	2/12/2002	→

The household members table displays the following:

- Number of Household Members – Count of the active members of the household.
- Head of Household - The head of Household is determined by the CIF with the oldest account origination date.
- Member Name – Name of the CIF
- Role – Designation of Head of Household or Member of Household
- Ownership % -
- Since – The first CIF origination date is the earliest origination date of a CIF related to this household.
- Actions – selection of the action arrow will redirect the user to the client page for the selected household member

The Client Information Widget

The Client Information Widget displays the information found on the Xperience Customer Inquiry page. The following client information is displayed:

- Client/Business Name
- Status: In/Active
- CIF
- Date of Birth
- Last 4 digits of the SSN/TIN
- Domicile Branch
- Customer Since
- Gender
- Age
- Occupation
- Employer
- ID Question
- ID Answer
- VIP status

Contact Information Widget

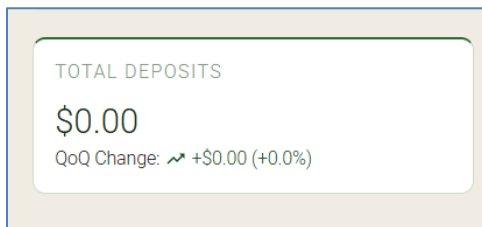

The Contact Information Widget displays the contact information found on the Xperience Customer Inquiry page. The following client information is displayed:

- [Primary] Email address
- [Home] Phone Number
- [Cell] Phone Number
- [Business] Phone Number
- [Primary] Address
- Additional Addresses

Bank Officers Widget

The Bank Officers Widget displays the client's domicile branch and sales associate.

Total Deposits Widget

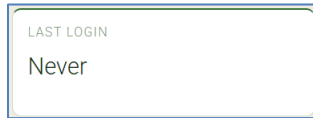

The Total Deposits Widget displays the total deposit balance across all accounts where the client is the primary on the account. The QoQ (Quarter over Quarter) will display in/decrease in deposits depicted with a up/down arrow, the amount and percentage of change compared to the prior quarter's deposits.

Total Loans Widget

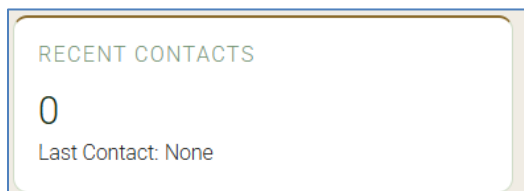

The Total Loans Widget displays the total loan balance of all loans where the client is the primary on the loan. The QoQ (Quarter over Quarter) will display in/decrease in loan amount depicted with a up/down arrow, the amount and percentage of change compared to the prior quarter's loan balance.

Last Login Widget

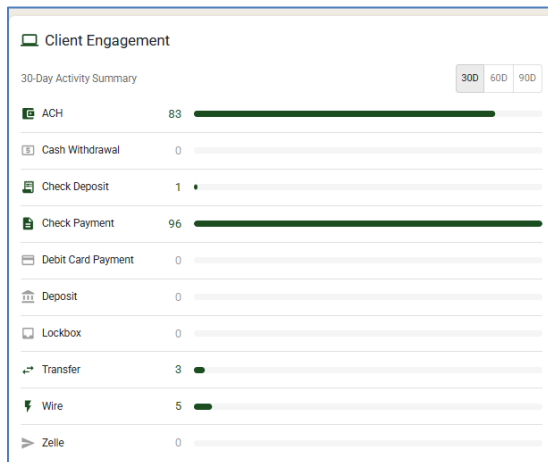

The Last Login comes from Q2 and will display the date/time stamp of the client's most recent successful online banking login.

Recent Contacts Widget

The Recent Contacts Widget displays the count of the customer contacting FMB.

Client Engagement Widget

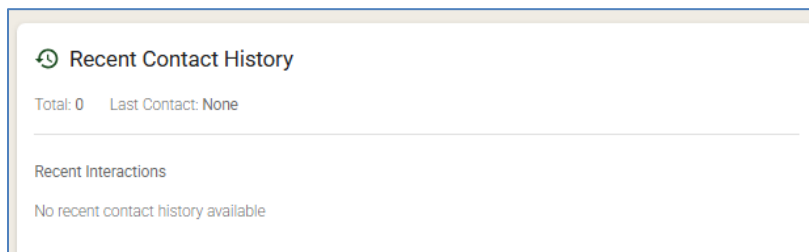

ClientIQ Training – User Guide

The Client Engagement Widget displays the total count, if available, of the following transaction type across all accounts where the client is the primary for the selected 30,60,90 day:

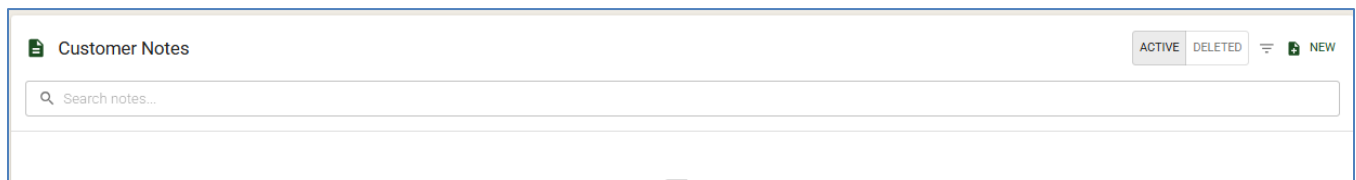

- ACH
- Cash Withdrawal
- Check Deposit
- Check Payment
- Debit Card Payment
- Deposit
- Lockbox
- Transfer
- Wire
- Zelle

Recent Contact History Widget

The Recent Contact History Widget pulls Synapsys customer interaction events.

Customer Notes

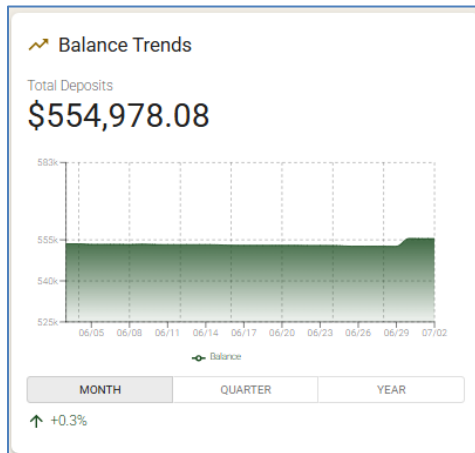

This is the only place in ClientIQ the user may enter text or edit notes. The notes are contained only to ClientIQ and cannot be sent to another system or department. Users will be able to create, edit, and delete a note along with the ability to tag it for legal hold.

Deposit Overview

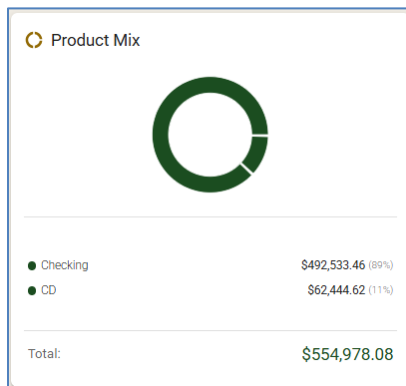

The Deposit Overview section of the Client page graphically displays all account type information and trends in the following widgets: Balance Trends, Product Mix, Recent Activity, Owned Accounts, Affiliated Accounts (Non-Owned).

Balance Trends Widget

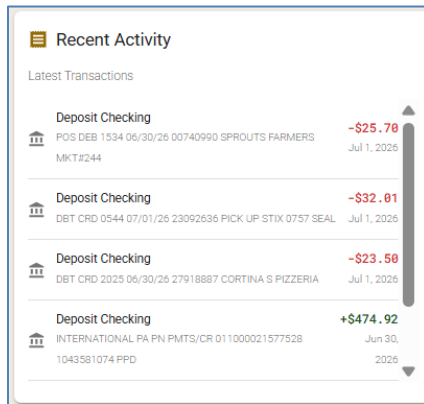

The Balance Trends Widget displays the total balance across all accounts where the client is the primary on the account as an interactive chart. The user can graphically view the balance trend by selecting Month, Quarter, or Year.

Product Mix Widget

Clients with multiple product types will show a pie chart of the product type as a percentage of the balance amount(s). Along with the details at the bottom of the chart.

Recent Activity Widget

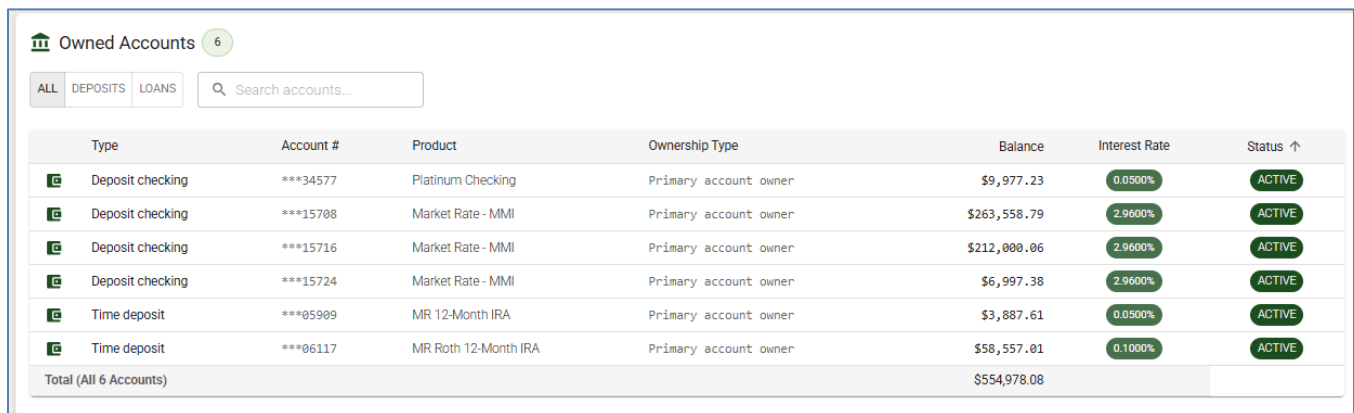

The Recent Activity Widget displays the five (5) most recent transaction details across all accounts where the client is primary on the account(s). The transaction details are sourced from Xperience account history.

Recent Activity		
Latest Transactions		
Deposit Checking	POS DEB 1534 06/30/25 00740990 SPROUTS FARMERS MKT 72244	- \$25.78 Jul 1, 2025
