UI File Usage Guide

Overview

This document identifies which UI files are actively used in the ClientIQ banking application versus alternative/example implementations kept for reference. This helps developers understand the production codebase and avoid modifying unused files.

Table of Contents

- 1. [Pages Directory](#)
- 2. [Components Directory](#)
- 3. [Examples Directory](#)
- 4. [UI Components \(shadcn\)](#)
- 5. [File Status Summary](#)

Pages Directory

Location: client/src/pages/

File	Status	Route	Purpose
HouseholdPage.tsx	ACTIVE	/household/:id , /household/customer/:customerId	Main household view with member list, accounts, subsidiaries
HouseholdPageOption1.tsx	DEMO	/household/option1	Design alternative - different layout approach
HouseholdPageOption2.tsx	DEMO	/household/option2	Design alternative - another layout variation
UserManagement.tsx	ACTIVE	/admin/users	Admin page for user/role management
not-found.tsx	ACTIVE	Fallback route	404 page for unmatched routes

Routing Configuration (App.tsx)

```
<Switch>
  <Route path="/" component={CustomerDashboard} />
  <Route path="/admin/users" component={UserManagement} />
  <Route path="/household/customer/:customerId" component={HouseholdPage} />
  <Route path="/household/:id" component={HouseholdPage} />
  <Route path="/household/option1" component={HouseholdPageOption1} /> // Demo only
  <Route path="/household/option2" component={HouseholdPageOption2} /> // Demo only
  <Route component={NotFound} />
</Switch>
```

Note: HouseholdPageOption1 and Option2 are accessible for design comparison but not linked from the main navigation.

Components Directory

Location: client/src/components/

Active Components (Production Use)

File	Imported By	Purpose
TopBar.tsx	App.tsx	Application header with logo and navigation
CustomerDashboard.tsx	App.tsx (route)	Main customer 360 view with all tabs
CustomerSearch.tsx	CustomerDashboard	Customer search functionality
CustomerOverview.tsx	CustomerDashboard	Customer profile header with badges
AccountSummaryTableVersion.tsx	CustomerDashboard	Account summary in table format
HouseholdRelationships.tsx	CustomerDashboard	Household member relationships
ContactInformation.tsx	CustomerDashboard	Customer contact details and addresses
Officers.tsx	CustomerDashboard	Assigned officer relationships
AccountList.tsx	CustomerDashboard	Full account list view
TransactionHistory.tsx	CustomerDashboard	Transaction history table
Deposits.tsx	CustomerDashboard	Deposit accounts and debit cards
ClientEngagement.tsx	CustomerDashboard	Engagement metrics card
TotalRelationshipSummary.tsx	CustomerDashboard	Total relationship value summary
RecentContactHistory_VariantC.tsx	CustomerDashboard	Recent contact history (selected design)
NotesSection.tsx	CustomerDashboard	Customer notes management
NotesTab.tsx	CustomerDashboard	Notes tab container
NoteEditorModal.tsx	NotesSection, HouseholdPage	Note creation/editing modal
NoteVersionHistoryModal.tsx	NotesSection	Note version history viewer
PermissionGuard.tsx	Various	RBAC permission wrapper component
AccountCard.tsx	AccountList, Deposits	Individual account display card

File	Imported By	Purpose
CustomerDetailModal.tsx	Various	Customer detail popup
DebitCardDetailModal.tsx	Deposits	Debit card detail popup
RiskCompliance.tsx	CustomerDashboard	Risk and compliance indicators

Alternative/Unused Components

File	Status	Purpose
AccountSummary.tsx	UNUSED	Original card-based account summary (replaced by TableVersion)
RecentContactHistory.tsx	UNUSED	Original contact history design
RecentContactHistory_VariantA.tsx	UNUSED	Design variant A - rejected
RecentContactHistory_VariantB.tsx	UNUSED	Design variant B - rejected

Selection Rationale:

- AccountSummaryTableVersion.tsx was chosen over AccountSummary.tsx for better data density
- RecentContactHistory_VariantC.tsx was selected as the final design after A/B testing

Examples Directory

Location: client/src/components/examples/

File	Status	Purpose
AccountSummary.tsx	EXAMPLE	Reference implementation for account display
ContactInformation.tsx	EXAMPLE	Reference implementation for contact info
CustomerDashboard.tsx	EXAMPLE	Early prototype dashboard
CustomerOverview.tsx	EXAMPLE	Reference implementation for customer header
CustomerSearch.tsx	EXAMPLE	Reference implementation for search
HouseholdRelationships.tsx	EXAMPLE	Reference implementation for household view
RiskCompliance.tsx	EXAMPLE	Reference implementation for risk display
TransactionHistory.tsx	EXAMPLE	Reference implementation for transactions

Purpose: These files are kept as reference implementations and design explorations. They are NOT imported anywhere in the production codebase.

UI Components (shadcn)

Location: `client/src/components/ui/`

All 50+ components in this directory are **ACTIVE** base UI components from shadcn/ui library:

Category	Components
Layout	card , separator , resizable , scroll-area , aspect-ratio
Forms	form , input , textarea , checkbox , radio-group , select , slider , switch , label
Buttons	button , toggle , toggle-group
Navigation	tabs , navigation-menu , menubar , breadcrumb , pagination
Overlays	dialog , drawer , sheet , popover , hover-card , tooltip
Feedback	toast , toaster , alert , alert-dialog , progress , skeleton
Data Display	table , avatar , badge , calendar , carousel , chart , accordion
Menus	dropdown-menu , context-menu , command
Misc	collapsible , input-otp , sidebar

File Status Summary

By Status

Status	Count	Description
ACTIVE	23	Components actively used in production
DEMO	2	Accessible for demonstration/comparison
UNUSED	4	Alternative designs not selected
EXAMPLE	8	Reference implementations
UI (shadcn)	50+	Base UI component library

Files Safe to Delete (Optional)

These files can be safely removed without affecting the application:

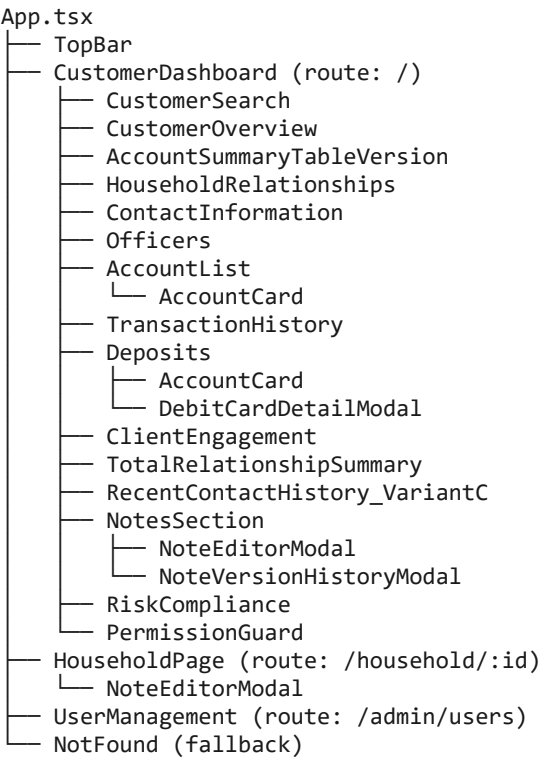

```
client/src/components/examples/           # Entire folder
client/src/components/AccountSummary.tsx  # Replaced by TableVersion
client/src/components/RecentContactHistory.tsx
client/src/components/RecentContactHistory_VariantA.tsx
client/src/components/RecentContactHistory_VariantB.tsx
client/src/pages/HouseholdPageOption1.tsx # If demo routes removed
client/src/pages/HouseholdPageOption2.tsx # If demo routes removed
```

Note: Keeping these files may be valuable for:

- Design history and decision documentation
- Future A/B testing or rollback scenarios
- Reference for similar component development

Import Chain Verification

To verify which components are actually used, check the import chain from `App.tsx` :

Document Version

- **Created:** December 2024
- **Last Updated:** December 2024
- **Application Version:** ClientIQ v3
